To whom it may concern

This is to certify that Aquaguard with Biotron Cartridge will provide the micro-cluster water through its multiple magnetic field effects. I have evaluated the studies done by Eureka Forbes Limited and convinced its benefits of providing healthy water. The seed germination test is very impressive and clearly indicates the fast absorption of water into to the cells.

Micro cluster water is very penetrating, fast detoxification from the body and improves cellular communication and hence this technology is innovative.

As per my opinion, Aquaguard with Biotron is very commendable and I endorse and recommend.
