92, Babhnaiya purab Nagar  
Panchayat Dostpur, P.O. Dostpur  
Sultanpur (U.P.) 228131

Mo:-8755664577

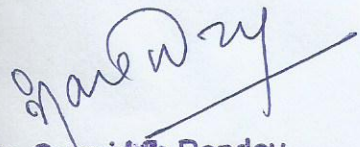

Date: 2<sup>nd</sup> May 2017

Place: Sultanpur

### To whom it may concern:

Aquaguard with BIOTRON cartridge is a very good innovation to de-cluster the water by utilizing its potential. I have evaluated the studies done by Eureka Forbes and convinced its benefits of providing healthy water. Biotron work on MAT (Mineral Absorbing Technology) technology. It helps to de-cluster the water molecules and make micro cluster water molecules for more bio- availability of water. This technology provides micro-cluster water and it becomes more penetrating. The benefits of drinking biotron water are: Easy cellular absorption of water, fast detoxification from the body, improved intercellular communication, more blood circulation and enhanced oxygen transportation. Biotron water is considered as the healthy water with anti-aging benefits.

As per my opinion, Biotron technology is very commendable and a creative innovation to provide healthy water to everyone. I endorse and recommend this BIOTRON technology to everyone.
